Nanjing Chemical Material Corp.

## Ethyl lodide

## Features of China Ethyl Iodide

- Product Name: Ethyl iodide
- Chemical Formula: C2H5I
- CAS No.: 75-03-6
- Dangerous Grade: 6.1

## Technical Data of Ethyl Iodide

| ITEMS | SPECIFICATIONS | RESULTS |
| :--- | :--- | :--- |
| Appearance | Colorless transparent liquid | Conforms |
| Assay(Dried Basis) | $\geq 99 \%$ | $99.57 \%$ |
| Specific Gravity | $1.94 \sim 1.96\left(20^{\circ} \mathrm{C}\right)$ | 1.94 |
| Distillation Range | $71 \sim 73^{\circ} \mathrm{C}$ | $71.9^{\circ} \mathrm{C}$ |
| Conclusion | Complies |  |
| Remarks | No free lodine |  |

## Nanjing Chemical Material Corp.

## Package and Storage:

- $100 \mathrm{~kg} /$ drum or $200 \mathrm{~kg} /$ drum
- Store in a cool, dry place. Keep container closed when not in use

## Application /Application Industries:

- Pharmaceuticals
- Reagent
- Organic synthesis

Ethyl iodide (also iodoethane) is a colorless, flammable chemical compound. It has the chemical formula C 2 H 5 I and is prepared by heating ethanol with iodine and phosphorus. On contact with air, especially on the effect of light, it decomposes and turns yellow or reddish from dissolved iodine. It may also be prepared by reaction between hydroiodic acid and ethanol distilling off the ethyl iodide. Ethyl iodide should be stored in copper powder to avoid fast decomposition, though even with this method samples don't last more than 1 year.

Because iodide is a good leaving group, ethyl iodide is an excellent ethylating agent. It is also used as the hydrogen radical promoter.

The mission in NCMC, Ethul lodide manufacturer is to be a bridge connecting dreams between China market and our partner in other countries, on the principle of equality, mutual benefit and win-win cooperation.
